

Why Guns you ask?

From many standpoints it makes perfect sense to collect, shoot and preserve firearms.

This is the Renaissance Era for C&R FFL holders (Reference #8).

Here is a simple list of reasons to collect guns that I have put together:

1) Guns appreciate in value. Or at least hold their value over the years. Most guns are almost guaranteed to increase in value. When you buy that old rifle you do not really spend your money. You are in fact investing your money in something that will increase in market value.

The stock market may go up and down but gun values can only go up. The more asinine restrictions put on us by the Liberal Politicians the higher the costs and value of guns will go. I can't tell you how many times I have heard an older collector say "wish I got it cheap back then when they were still being imported". Just food for thought.

2) Security. They serve as a defensive tool. There is nothing wrong with having the peace of mind that owning a weapon gives you. It is your God Given Right under the Constitution. Ask yourself this question: Do I want to live in a world where the Citizen is unarmed and only the Government and the Criminals have guns? Can you guess what my answer would be?

3) Preserving History. That's right. You are preserving history. Many Governments around the world are destroying their older stockpiles of guns rather than let them go to the market where we can buy them. Many of these are WW1 and WWII vintage weapons with a great history too them. Even our own Government is destroying WWII Garand Rifles (for example) and many liberals want to destroy the CMP program available to Americans to buy back the WWII era U.S. Army guns that they have already paid for with their tax dollars and with their blood.

By buying one you are saving it from the scrap yard and from Bubba who wants to turn a piece of history into a sporting rifle. I have seen \$5000 German Sniper rifles made into \$50 cheezy sport hunting rifles by Bubba and it is truly sad.

4) Do it while you can. Nobody can foresee what laws will be enacted in the future. The 2nd Amendment to the Constitution is slowly being watered down by the Liberals. It may even cease to exist if these folks get their way. At the risk of sounding like a tin-foil-hat type, do it now while you can.

5) For your Children's, Children's Children. That's right. If we ever loose our Second Amendment Rights and become a feminized gun-less society like Australia and Most of Europe then at least you will have collected enough firearms to pass down the family tree to future generations of Kin. This brings new meaning to the overused liberal term "Think of the Children!". Gasp!

6) Survival. Turn on the 6pm News and observe the brave new world we live in. Nobody can guarantee our safety and security and nobody can tell you what our Country will be like in 200, 20 or even 5 years from now. It is no big secret that when the poop hits the fan that the people who are armed are 99.9% more likely to survive than those who have chosen to be unarmed. What is your choice?

7) It's your duty! It is not just your right under the Constitution to keep and bear arms. It is your duty! Our forefathers put this into our Constitution to keep our Government in check. If it is deleted from our Constitution or if there is no interest in it's preservation by the brainwashed masses then it no longer serves it's intended purpose. History will be doomed to repeat itself. My personal opinion is that every Family in American should have three things. A Computer, an Internet Connection and at least one Firearm. Be informed and be armed.

8) This is the C&R Renaissance. Let me explain. As a C&R FFL Holder you can have Rifles and Pistols mailed directly too you without getting permission from a Government entity every time you do it.

C&R Weapons are basically rifles and pistols that are 50 years or older and are in unaltered original military configuration. There are exceptions to this though so it is best to check with the BATF if unsure.

Here is the problem: The next batch of rifles to reach age 50 will be "select fire" (as in full auto) weapons and we all know that these will NOT be imported. Or at least not in original C&R configuration.

What does this mean? It means that basically all the guns you will be able to buy with your C&R FFL today are the only guns you will ever be able to buy from here to eternity.

Once the market dries up and all of them have been snatched up by eager collectors, THAT IS IT! End result is that their price and value will only go up from there. It's the basic law of supply and demand. This is why a \$30 Sten Machine Gun costs \$3000+ in this country. Machine Guns can no longer be imported so what is in the country right now is it as far as the market is concerned.

There is no better time to collect C&R firearms than RIGHT NOW. If you wait too long it will be more expensive to collect them and they will be harder to find. This is a fact. Just something to keep in mind if you are a procrastinator.

9) To piss off the Liberals. OK, I just had to put this in here just for fun. The liberals would have you believe that a kitten dies every time a gun is purchased. Use your own common sense here.
